# Victor Nguyen

I'm a friendly Senior Frontend Developer who is pretty good at working within today's ubiquitous React ecosystem, but terrible at writing about himself. I'm looking for a team to succeed, fail and grow with. I love a clean commit history.

## Employment History

**Belong**

Oct 2021 - Aug 2022

*Senior Frontend Developer (Contract)*

Feature development for the consumer-facing account management app built with Next.js, TypeScript, MobX, Contentful (headless integration) and Styled Components.

**Marketplacer**

Nov 2020 - Mar 2021

*Senior Software Developer*

Rebuilding the consumer-facing side of the e-commerce platform using Next.js, TypeScript, Apollo, Styled Components and React Testing Library. Contributed various clients-side performance improvements to the platform.

**CourseLoop**

Jan 2020 - Nov 2020

*Senior Frontend Developer*

Contributing features, performance, accessibility and direction to a suite of TypeScript & React-based curriculum design applications and UI component library.

**AKQA**

Jun 2019 - Dec 2019

*Senior Frontend Developer (Contract)*

Contributed to two React-based projects, a large-scale Gatsby + Contentful integration and a consumer-facing insurance dashboard application.

**Publicis Sapient**

Jan 2019 - May 2019

*Senior Interactive Developer (Contract)*

Feature development for internal insurance provisioning software. A React, Redux, Flow, Jest codebase integrated with a headless Sitecore instance.

**Deloitte Digital**

Oct 2015 - Mar 2017

*Senior Frontend Developer (Contract)*

Led the client-side development of an internal cloud accounting application. Hipster stack: React, Redux, CSS Modules, Webpack, Jest, Node, Salesforce integration.

**REA Group**

Jul 2015 - Oct 2015

*Software Developer*

My time at REA was relatively short (my choice — ask me about it), but hugely influential in my growth as a software developer.

**CGU Insurance**

Oct 2014 - Jun 2015

*Senior User Interface Developer (Contract)*

Feature development for the home stretch of a long-running project built with an undocumented, custom JS MVC framework one of the guys upstairs wrote!

**Isobar**

Jul 2014 - Oct 2014

*Frontend Developer (Contract)*

AngularJS for a marketing campaign web app. Implemented atomic design principles to help us organise the UI, which was a fun workflow exercise.

**Reactive**

Mar 2014 - May 2014

*Frontend Developer (Contract)*

My first foray into contracting sent me to New York, where I worked on some JavaScript data visualisation for a sports betting client. I also finally got to see the Knicks play in person.

**Igloo**

Sep 2008 - Mar 2014

*Frontend Developer into Technical Lead*

This was where my journey from Developer, to Lead Developer, to Development Manager, to Technical Lead happened. Impossible to summarise — ask me about it. Highlights include delivering large-scale projects for Mazda Australia and Cricket Australia, building a great development team, and cultivating a great culture within it.

# Skills

TypeScript    JavaScript (ECMAScript)    React    Next.js    Gatsby    Redux

Node    Jest    React Testing Library    Cypress    CSS    Styled Components

# Hobbies

Basketball    Snowboarding    Electric Skateboarding    Video games

Building custom mechanical keyboards (spending money)
